

Scope: CCTV, Door entry, Intruder & fire alarm systems

CASE STUDY

LSS were asked to provide a security solution for the revamped Annbank Primary School as part of the ongoing refurbishment and extension project.

A state of the art security access system was installed on all entry doors to provide the school with the necessary level of protection and peace of mind.

A high class CCTV system was also installed using the latest Hik Vision technology cameras and software, which can be fully managed by the client on site.

This covers all areas of the external building as well as the main entry point into reception.

LSS also carried out a full upgrade of the existing fire alarms in the existing part of the school and then installed a brand new L2 system to cover the newly built extension.

The Intruder Alarm systems were also upgraded at the same time and a new grade 2 setup added to the newly built areas.

PROJECT INFORMATION

Client: South Ayrshire Council

Duration: 7 months

Completion: May 2017

Main Contractor: Ashleigh

Design Engineer: FLN

WHY CHOOSE LSS?

Smart. Innovative. Integrated.

LSS is one of the UK's leading providers of life safety and security products and services.

Utilising the latest technologies and systems design our focus is on integration, innovation and development of reliable, cost-effective solutions for individuals and organisations. A life safety system can be defined as components of any buildings infrastructure that monitor the environment in and around the building for changes in state indicating the presence of fire or smoke.

Systems installed then react to this change of state in a manner that reduces or eliminates the risk of injury or damage. At Life Safety Services we provide a complete, professional, standards compliant service for the design, installation and maintenance of security and life safety systems.
